

```

\begin{center}
\begin{asy}[height=4cm,inline=true,attach=false,viewportwidth=\linewidth]
currentprojection=orthographic(5,4,2);
draw(unitcube,blue);
label("$V-E+F=2$", (0,1,0.5), 3Y, blue+fontsize(17pt));
\end{asy}
\end{center}

```

One can also scale the figure to the full line width:

```

\begin{center}
\begin{asy}[width=\the\linewidth,inline=true]
pair z0=(0,0);
pair z1=(2,0);
pair z2=(5,0);
pair zf=z1+0.75*(z2-z1);

draw(z1--z2);
dot(z1,red+0.15cm);
dot(z2,darkgreen+0.3cm);
label("$m$", z1, 1.2N, red);
label("$M$", z2, 1.5N, darkgreen);
label("$\hat{\ }$", zf, 0.2*S, fontsize(24pt)+blue);

pair s=-0.2*I;
draw("$x$", z0+s--z1+s, N, red, Arrows, Bars, PenMargins);
s=-0.5*I;
draw("$\bar{x}$", z0+s--zf+s, blue, Arrows, Bars, PenMargins);
s=-0.95*I;
draw("$X$", z0+s--z2+s, darkgreen, Arrows, Bars, PenMargins);
\end{asy}
\end{center}
\end{document}

```
